CS410: Professional Workplace Development I

Thomas J. Kennedy

1.0 Introduction

Introduce the CS410 product and the approach to demonstrating its characteristics through prototyping (essentially an abstract.) This section should

1. *Summarize the societal problem with some reference/date support*
 2. *Outline problem and needed solution characteristics*
 3. *Briefly introduce your product by name*
- Individuals with ADHD diagnoses or ADHD-like traits often struggle with consistent routine development.
 - ADHD is classified into three subtypes, or presentations, by the American Psychiatric Association
 - Inattentive
 - Hyperactive-Impulsive
 - Combined
 - Gold Star is a web-based habit-building and time management platform tailored to those affected by ADHD.
 - It is designed to help users organize their schedules, break down tasks, and build sustainable routines — making it easier to start, stay on track, and follow through everyday.

2.0 Gold Star Product Description

Provide a top-level description of CS 410 product for the average reader; Provide a summary of the solution and its goals and objectives. This section should be on paragraph minimum.

2.1 Key Product Features and Capabilities

What does it do? WHat is significant/unique/innovative about it? What does it accomplish?

Describe how this solves the problem.

2.2 Major Components

Provide an overview of the hardware needed to support the solution. Describe how it is structured based on CS410 MFCD. Define and describe the software to be developed.

3.0 Identification of Case Study

For whom is this product being developed? Why? WHo else might use this in the future?

4.0 Glossary

- **Application Programming Interface (API)** - A set of standard rules, protocols, and definitions that allows different software applications to interact.
- **Attention-Deficit/Hyperactivity Disorder (ADHD)** - A common neurodevelopmental disorder that alters the brain's ability to plan, focus, remember instructions, and manage emotions.
- **Cascading Style Sheets (CSS)** - A style sheet language used to determine the visual presentation, layout, and aesthetics of a website.
- **GitHub** - A cloud-based platform where developers can collaborate on software code.
- **Hyperactivity** - A state of being unusually or abnormally active.
- **HyperText markup Language (HTML)** - The standard markup language used to create and structure webpages.

- **Javascript (JS)** - A lightweight programming language used to build dynamic interactivity on web pages.
- **Jest** - An open-source Javascript testing framework.
- **JSDoc** - An API documentation generator and syntax standard for JavaScript.
- **PostgreSQL** - An open-source RDBMS that stores, manages, and retrieves data.
- **Reinforce** - To make something stronger, more effective, or more compelling by adding support.
- **Relation Database Management System (RBMS)** - software used to store, manage, query, and retrieve data structured in table form.
- **Routine** - A sequence of actions regularly followed, or a fixed program.
- **Visual Studio Code (VSCode)** - A development environment used for software engineering and web development.
